

designed exclusively for the residents of one miramar street

college thanksgiving

Thanksgiving is a time to get together with friends and family to enjoy each other's company, be thankful for the positive things in life, and of course: eat more in one sitting than anyone should in an entire day! The latter can be too expensive on a budget though. Come join friends and neighbors at the Residential Services College Thanksgiving. On Monday the 23rd, stop by the community room in building 2 (above the building 2 laundry room) for turkey sandwiches, potato chips, Crazins, and drinks. We will also raffle off some pies so that if you have plans for Thanksgiving, you have dessert to take... or you can just eat it yourself. Dinner starts at 6pm, so don't be late!

crime watch

No community is perfect when it comes to crime, so it is always a good idea to be vigilante and think about your possessions. At Universities the most common thefts are of bikes and school related items like books, computers, and personal bags. When you are locking up your bike, try your best to find a well lit area that is easily monitored by yourself or by others. It is also highly recommended to have your bike registered, which can be done for \$6 at the Bike Shop located in Student Center A. When you leave your possessions some place, like in a car or a classroom, put them out of sight or have someone watch them for you. Also always remember to lock your car or apartment when you are leaving it. As always, if you ever notice anything suspicious or have a theft to report, contact the campus police at 858.534.HELP(4357).

new 20 minute parking

You may or may not have noticed, but new 20 minute parking spaces have been made around the complex. In an effort to make life convenient, especially when it comes to grocery shopping, a few spaces around all four buildings have been converted. The spaces are painted green and have signs indicating the 20 minute restriction. All of these spaces were previously regular parking spaces, so do not be tempted to park in them with a permit for longer than 20 minutes, as you could be ticketed. Residential Services knows a lot of you have been patiently waiting for these spaces for a long time, so we thank you for your patience and hope that you enjoy the new addition to the community!

satellite dishes

One of the great aspects of our community is that residents are allowed to choose any cable provider they want. If someone does not want to go with a particular company, possibly due to customer service, but more importantly due to content, they can opt to choose a more fitting service, including satellite! If you would like to have satellite service, please stop by the Residential Services Office to fill out a satellite dish installation request. When you fill out the request form, you can also request that a maintenance representative comes out to your apartment prior to the installation for an inspection and explanation of how the satellite dish should be installed. For more details, contact the Residential Services Office.

trash talk

It may not seem like much at a glance, but having the trash cans in the court yards can be a huge advantage. Unfortunately, as of late, their usefulness has been abused. The trash cans in the court yard are meant for individual items of trash, not bags of apartment trash that are being disposed of. If you are taking out the trash from your apartment, whether it is a big trash bag or as small as a grocery bag full of trash, take the waste to any one of the dumpsters located around the buildings. If these bags are left at the trash cans in the court yards, it quickly fills them, often blocks the hole, and causes an unsightly and unsanitary mess. Please be courteous to your fellow residents as well as of the community staff and properly dispose of your apartment waste at the proper location. For information on where the dumpsters are located around the community, feel free to contact the Residential Services Office or refer to the map on our website.

vehicle maintenance

One of the side effects of owning a vehicle is the costly and often frustrating maintenance. I'm sure everyone has a story of a time that some expensive or excessive work had to be done on their vehicle, and we would all be lucky if we never had one of those moments again. If something does happen though, and you are forced to make repairs to a vehicle, please remember that vehicle maintenance is not permitted within the complex or the parking lots. Vehicle maintenance can lead to messes, occupy excess parking spaces, and generate waste that can be harmful to the community, as well as not properly disposed of by our waste receptacles. Even if you are equipped to repair your vehicle, please make sure to exit the premises before working or having someone complete the work. Thank you for your understanding and cooperation.
